

## Get all the Benefits of a Solar Energy System without any of the cost and maintenance **NO CASH INVESTMENT**

### **Solar Power Purchase Agreement**

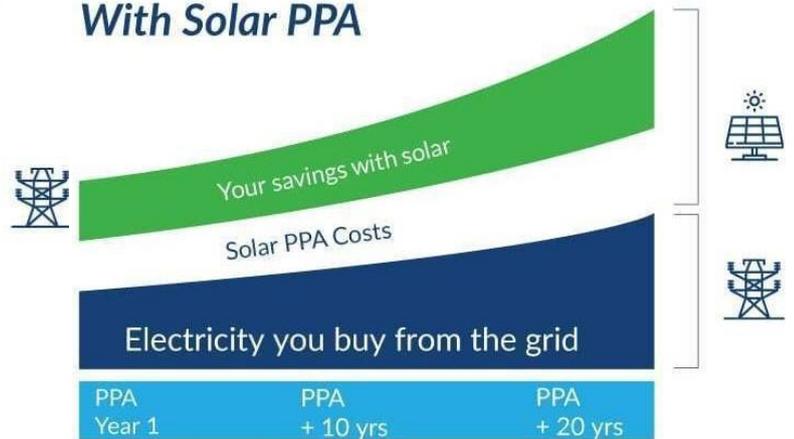

Solar as a Service, also known as a solar Power Purchase Agreement (PPA), means no cash outlay to your business and will provide electricity at a cost significantly lower than the grid.

This gives your business immediate savings and a long term energy hedge as you know the electricity cost for the next 10 to 25 years, compared to only 1 to 3 years from the grid.

#### Without Solar

#### With Solar PPA

The Green Power Fund PPA brought to you exclusively by Channel Partners Future Energy Savers and the Green Guys Group offering a saving protection guarantee with a minimum 10% discount to present Grid cost, for the fixed term of your PPA agreement.

### **Discounts from day one typically range from 25% to 50% off GRID electricity.**

You are also only contracted to buy the electricity you consume and pass on any benefit you receive for any solar exported to the grid!

Phone Ian 0401-226265 to find out how much we can save a year for your business.

## **Our Customers have Saved**

"There was **excellent communication** between all parties involved which **made the process seamless**.

*I could not have asked for any better and I have already recommended a PPA to several other managers in the club industry."*

—David Jackson CEO, West Wallsend Workers Club

# The Benefits of Our Solar PPA Everyone Wins!

## Owners Operator Benefits / Tenant Benefits Commercial Landlord Benefits!

9. Improving leasing by offering tenants low-cost solar power
10. Potential to charge a higher lease
11. Increased access to capital due to improved energy ratings of the building.
12. Potential improvement of NABERS rating

<p><b>SAVE MONEY EVERY MONTH ON YOUR ELECTRICITY BILL</b></p> <p>Your system works to generate energy almost every day — even when it's cloudy. Once it's installed, you will be generating energy and saving money</p>	<p><b>RISING ENERGY COSTS</b></p> <p>Energy costs in Australia continue to soar, solar is considered a low-cost energy option. Electricity prices across the country have had a substantial increase from July 2017, installing solar now has never made better sense to make the switch.</p>	<p><b>GREAT FINANCING IS AVAILABLE</b></p> <p>Most financing options are no deposit financing and the savings in some of cases are cash flow positive with the system being paid off in 5-7 years, leaving the remainder of the systems life (25+ yrs) to pay an exceptional return.</p>
<p><b>SOLAR ADDS VALUE TO YOU BUSINESS</b></p> <p>Solar is an investment that pays a great return over many years and outperforms other investments. It adds value to the resale price of your property.</p>	<p><b>CONTINUING SOLAR INCENTIVES</b></p> <p>Upfront Solar incentives are still available and can account for a significant percentage of the upfront cost of the system STC's are an upfront discount on eligible systems.</p>	<p><b>REDUCE YOUR CARBON FOOTPRINT</b></p> <p>The average solar system offsets three-to-four metric tons of carbon pollution from fossil fuel each year – the equivalent of planting 100 trees. Solar energy is renewable, safe, and is affordable and accessible.</p>

### Let us help you!
